INTRODUCTION

The aim of the project is to firstly, create a website for Drunken Panda. The page we have to create is an official website. This website will provide the information about the Drunken Panda cafe's background, menus, locations etc. So, this is our front end for the project. During our first meeting client demanded he wanted us to add a social media advertisement for the website .We have taken into consideration and added this to the last part of our iteration. The client also wanted to create an option for online ordering.

DEVELOPMENT

The project was to create a website for a cafe based in Kerala, India. The requirement from the client included home page for the website which included the brief description of the café, navigation bar, existing products, promotions, and locations of the stores across Kerala, India. The top navigation included Home, About Us, Menu, Offers, Locations, and Contact us. There was also search option available in the website.

CONCLUSION

Update Menu.

Provide location with google maps.

Functional prototype.

ABOUT US

Dhanvin Thomas Thachil

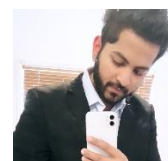

I'm a student at Whitireia Community Polytechnic. I am looking forward at starting my career as a developer after I graduate. I believe I will be able to explore the possibilities of IT in New Zealand.

Athul Krishna Sajeevan

I'm a Graduate Diploma student at Whitireia Community Polytechnic. I have a huge interest in IT and particularly data analysis. That is why I took the course for it. I believe that I will be able to find a perfect opportunity in the field.

Hussain Dholkawala

I study at Whitireia Community Polytechnic. This is my last semester. I have a keen interest in web development. I hope to explore the opportunities in IT in New Zealand.
